Accountant in Business (FAB/F1)

MODULE OVERVIEW:

Understand how businesses operate effectively, efficiently and ethically and the critical role finance professionals play in achieving this. This course will help you understand business in the context of its environment, including economic, legal and regulatory influences on such aspects as governance, employment, health and safety, data protection and security.

WHAT YOU WILL LEARN:

- The purpose and types of businesses, and their interactions with stakeholders and the external environment
- Business organisation structure, functions and the role of corporate governance
- The function of accountancy and audit
- The principles of authority, leadership and team management
- Personal effectiveness as the basis for effective team and organisational behaviour
- Upholding professional ethics and professional values in business

KNOWLEDGE AND SKILLS STUDENTS WILL GAIN FROM THIS MODULE:

- Learn how to analyze and apply practical knowledge
- Business organization structure functions and role of corporate governance
- How accountancy and audit support effective financial management and communication
- Leadership and vital role of professional ethics and values

Management Accounting (FMA/F2)

MODULE OVERVIEW:

Learn management accounting techniques to help you support businesses to plan, control and monitor performance. This course will introduce you to different ways of managing finance within an organisation with the aim of enhancing business performance.

WHAT YOU WILL LEARN:

- The nature, source and purpose of management information
- Cost accounting techniques
- Budgets for planning and control
- Comparisons and analysis of variances
- Performance measurement and monitoring of business performance

KNOWLEDGE AND SKILLS STUDENTS WILL GAIN FROM THIS MODULE:

- How organizations finance their operations
- Plan and control cash flows, corporate and personal
- Use of working capital and principles of capital investment decisions

Financial Accounting (FFA/F3)

MODULE OVERVIEW:

Learn the underlying principles and concepts of financial accounting, accounting techniques and the preparation of basic financial statements. The course will allow you to demonstrate technical proficiency in the use of double-entry techniques, including the preparation and interpretation of basic financial statements for sole traders, partnerships, companies and simple groups of companies.

WHAT YOU WILL LEARN:

- Context and purpose of financial reporting
- Qualitative characteristics of financial information
- Use of double-entry and accounting systems
- How to record transactions and events
- How to prepare a trial balance (including identifying and correcting errors)
- How to prepare basic financial statements for incorporated and unincorporated entities
- How to prepare simple consolidated financial statements
- Interpretation of financial statements

KNOWLEDGE AND SKILLS STUDENTS WILL GAIN FROM THIS MODULE:

- Record, process and report business transactions
- Use the trail balance and identify and correct errors
- Draft financial statements
- Apply the qualitative characteristics of useful information
